

Brushless and Stepless servo drives & motors with integrated electronics.

ITALIAN ART IN MOTION CONTROL

IBD 1.2 to 30 Nm

ISD 4.6 to 12 Nm

CMZ engineers and manufactures electronic systems and solutions for industrial motion control.

IBD & ISD servo drives and motors provide cost-saving, performing solutions with integrated electronics at high and low speed for packaging, beverage, weighing, dosing while ensuring highest precision in multi-axis control. CMZ range is complete featuring integrated drive, connectivity and internal programmability IEC61131-3 compliant.
